PROJECTS

Employee Productivity & Burnout Analysis Tool | Python, Pandas, Power BI

- Analyzed a dataset of 500+ employee records to examine productivity patterns and potential burnout indicators.
- Cleaned and prepared fields including work hours, tasks completed, overtime, and break patterns for analysis.
- Created a productivity score and rule-based categories to summarize employee performance.
- Built interactive Power BI dashboards with KPIs and drill-through visuals to support team-level monitoring.

E-Commerce Sales Analysis Dashboard | Power BI, SQL, Excel

- Analyzed 12+ months of e-commerce transaction data to explore revenue trends, category performance, and customer behavior.
- Used SQL queries to join and aggregate relational data, preparing results for reporting and visualization.
- Developed a multi-page Power BI dashboard with measures for total revenue, month-over-month growth, average order value, and customer ratings.
- Added slicers and cross-filtering by category, city, and platform to enable interactive exploration of sales performance.
